

Haarlem July, 2008.

Dear Customer,

On July 1st 2008 WIAT BV opened their newly built office and warehouse close to Schiphol Airport. The new facility is located in the heart of aircraft arrivals and departures, namely between the 4th and the 5th North/South runway of the Airport. The most important reason for the move is to further improve the service to our customer base. This location is the closest ever to the airport to ship spare parts within minutes to any destination worldwide.

Until further notice you may use our new and current postal address
